INTRODUCTION

The NDC Partnership is open to countries, international institutions, and civil society organizations that are committed to ambitious implementation of Nationally Determined Contributions (NDCs) under the Paris Agreement and the 2030 Sustainable Development Goals.

The NDC Partnership has over 100 members, including developed and developing countries in all regions of the world, as well as major international institutions and non-state actors. Membership is voluntary, and by joining the NDC Partnership members gain access to a global network of knowledge and resources to support their work in climate action. The Partnership's uniquely flexible platform provides members with the opportunity to achieve greater synergies and identify options for stronger, more ambitious climate action through collaboration, shared learning, support coordination, and the alignment of national and subnational initiatives.
