

**WORKING TOGETHER TO ACCELERATE
CLIMATE AND DEVELOPMENT ACTION**

NDC 
PARTNERSHIP

WHO WE ARE

We are a global coalition of countries and institutions collaborating to drive transformational climate action through sustainable development.

Through our Partnership, members leverage their resources and expertise to provide countries with the tools they need to implement their NDCs and combat climate change to build a better future.

In 2015, the world endorsed the Paris Agreement and the 2030 Agenda for Sustainable Development. These historic accords presented countries with an unprecedented opportunity to align the climate and sustainable development agendas to spur economic growth and improve the livelihoods of all people.

Nations signal their commitments to the Paris Agreement through Nationally Determined Contributions (or NDCs) – each country’s strategy to cut its own greenhouse gas emissions and build resiliency against the negative effects of a changing climate. Countries will revise their NDCs every five years to become more ambitious to limit Earth’s temperature rise and adapt to its impacts.

OUR MEMBERS

The NDC Partnership has over 100 members, including developed and developing countries in all regions of the world, as well as major international institutions and non-state actors.

HOW WE WORK

The NDC Partnership works directly with national governments, international institutions, civil society, researchers, and the private sector to fast-track climate and development action.

IN-COUNTRY ENGAGEMENT

The Partnership engages directly with ministries and other stakeholders to assess needs and identify opportunities for collaboration. Members provide coordinated assistance to advance NDC implementation.

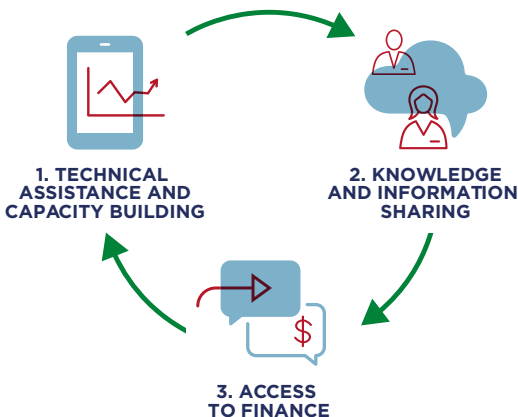

GLOBAL KNOWLEDGE SHARING

The Partnership supports nations in achieving their climate goals by increasing access to knowledge resources and building a peer community around the experiences of countries implementing their NDCs.

HOW WE ACHIEVE RESULTS

We use a country-driven approach that helps governments set priorities and connect them to available resources from across our membership. As every country has its own needs and challenges, our approach adapts to each country's unique situation.

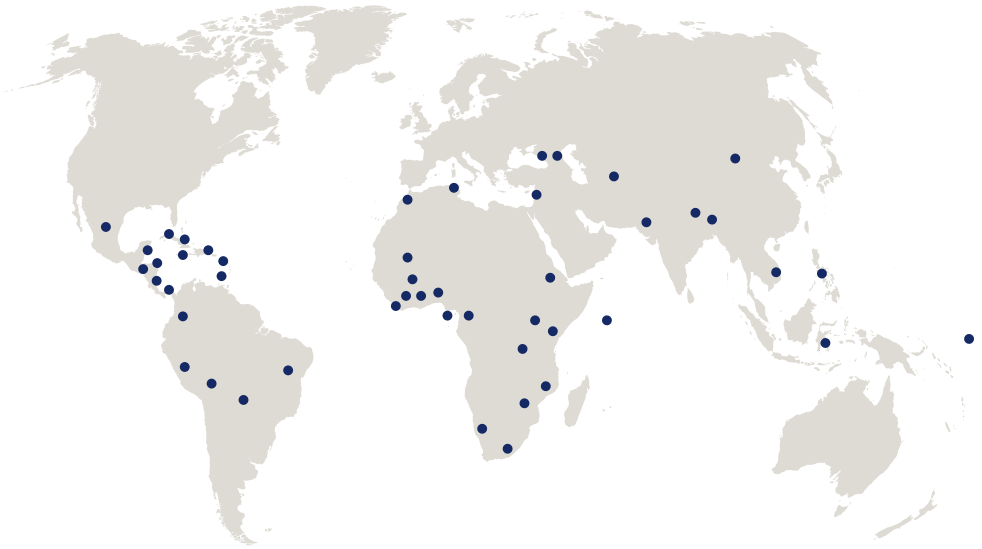

The Partnership aims to increase alignment, coordination, and access to resources to link needs to solutions.

1. We support governments in defining the processes, policies, and plans required to deliver NDC goals, alongside other development objectives.
2. We enable countries to learn from and support each other, turning local know-how into global action through knowledge tools and peer-to-peer exchanges.
3. We facilitate countries in aligning their NDC goals with financial resources.

ENGAGING ON THE GROUND

In 2019, members of the NDC Partnership are working together to provide technical assistance and capacity building in over 40 countries to effectively implement current NDCs and increase ambition.

DID YOU KNOW?

These countries are developing NDC Partnership Plans to identify climate priorities and match them to partner resources to accelerate NDC implementation. Learn more at: ndcpartnership.org/how-we-work
