USD45.6
million

MILLION MOBILISED

- USD23.9 million from TAF
- Over USD21.7 million in partner financing

The first round of NDCs submitted in 2015 were often developed quickly, with limited engagement from key parts of government and society.

This resulted in missed opportunities to link climate and development agendas and enable ambition and inclusive climate action.

The NDC updating process required every five years under the Paris Agreement presents significant opportunities to align national climate and development agendas to promote sustainable and inclusive growth.
